MoviPrep and Magnesium Citrate

Instructions for Your Colonoscopy

Please read these instructions carefully at least 7 days before your colonoscopy.

You must flush the bowel totally of waste so that the doctor can have a clear view and do a thorough exam. Without your efforts, we may have to repeat the exam.

Follow these directions exactly and complete all steps before the exam.

Getting ready

☐ A nurse will call you 1 week before your exam. At this time, you may choose a pharmacy for pick-up of the MoviPrep prescription.

☐ You must arrange for an adult to drive you home after your exam. Your colonoscopy cannot be done unless you have a ride. If you need to use public transportation, someone must ride with you.

☐ Check with your insurance company to be sure they will cover this exam.

☐ If you have advanced kidney disease or are on dialysis: please call the endoscopy center. We may need to change how you get ready for this exam.

7 days before the exam (Date) __________

- Talk to your doctor: If you take blood-thinners (such as Coumadin, Plavix, Xarelto), your prescription or schedule may need to change before the test.

- Stop taking fiber supplements, multi-vitamins with iron, and medicines that contain iron.

- Continue taking prescribed aspirin; talk to your prescribing doctor with any concerns.

- Stop eating nuts and seeds. These can stay in the colon for days.

- If you have diabetes: Ask to have your exam early in the morning. Also, ask your doctor if you should change your diet or medicines.

Go to the drug store and buy:

- Moviprep
- One 10-ounce bottle magnesium citrate
- One 64-ounce bottle of Gatorade (NOT powdered and no red or purple)
- 2 simethicone tablets.
3 days before the exam \((\text{Date})\) __________

- **Begin a low-fiber diet:** No raw fruits or vegetables, whole wheat, seeds, nuts, popcorn or other high-fiber foods (see list on page 3). No bulking agents: (bran, Metamucil, Fibercon) and no Olestra (a fat substitute).

- Drink at least to 4 to 6 large glasses of sports drink (not red or purple) each day.

One day before the exam \((\text{Date})\) __________

- Follow the low-fiber diet until 1 p.m.

- After 1 p.m., drink only **clear liquids** (see the list below.) Drink at least 8 to 10 full glasses of clear liquids during the day.

- **At 3 p.m.**, Mix and start drinking the first dose of Moviprep. You may chill the solution. Drink an 8-ounce glass every 10-15 minutes until gone.

- **After 10 p.m.**, start drinking the second dose of Moviprep. Drink an 8-ounce glass every 10 to 15 minutes until gone.

- Stay near a toilet while using this medicine. Besides diarrhea (watery stools), you may have mild cramping, bloating and nausea.

What are clear liquids?

**You may have:**

- Water, tea, coffee (no cream)
- Soda pop, Gatorade (not red or purple)
- Clear nutrition drinks (Enlive, Resource Breeze)
- Jell-O, Popsicles (no milk or fruit pieces) or sorbet (not red or purple)
- Fat-free soup broth or bouillon
- Plain hard cand, such as clear life savers (not red or purple)
- Clear juices and fruit-flavored drinks such as apple juice, white grape juice, Hi-C and Kool-Aid (not red or purple)

**Do not have:**

- Milk or milk products such as ice cream, malts or shakes
- Red or purple drinks of any kind such as cranberry juice or grape juice. Avoid red or purple Jell-O, Popsicles, Kool-Aid, sorbet and candy
- Juices with pulp such as orange, grapefruit, pineapple or tomato juice
- Cream soups of any kind
- Alcohol

Day of exam \((\text{Date})\) ______________

- **4 to 6 hours before your exam**, drink the bottle of magnesium citrate and take 2 simethicone tablets.

- You may drink clear liquids until 2 hours before your exam.

- If you have asthma: Bring your inhaler with you.

- If you must take medicine, take it with sips of water.

- Please arrive with an adult who can take you home after the test: The medicine used will make you sleepy. If you do not have someone to take you home, we may cancel your test.
# Low-fiber Diet

## You can have

**Starches**
- White bread, rolls, biscuits, croissants, Melba toast, white flour tortillas, waffles, pancakes, French toast; white rice, noodles, pasta, macaroni; cooked and peeled potatoes; plain crackers, saltines; cooked farina or cream of rice; puffed rice, corn flakes, Rice Krispies, Special K

**Vegetables**
- Tender cooked and canned vegetables without seeds, including carrots, asparagus tips, green beans, wax beans, spinach; vegetable broths

**Fruits and fruit juices**
- Strained fruit juice, canned fruit without seeds or skin (not pineapple), applesauce, pear sauce, ripe bananas, melons (not watermelon)

**Milk products**
- Milk (plain or flavored), cheese, cottage cheese, yogurt (no berries), custard, ice cream (no nuts)

**Proteins**

- Any yogurt with nuts, seeds or berries

**Proteins**
- Tough, fibrous meats with gristle; cooked dried beans, peas or lentils; crunchy peanut butter

**Fats and condiments**
- Pickles, olives, relish, horseradish; jam, marmalade, preserves

**Snacks, sweets and drinks**
- Popcorn, nuts, seeds, granola, coconut, candies made with nuts or seeds; all desserts that contain nuts, seeds, raisins and other dried fruits, coconut, whole grains or bran
Your colonoscopy

What should I expect?

You will receive medicines through an IV to sedate you and make the exam more comfortable. After the exam, we will take you to a recovery room and watch you closely for about an hour.

How will I feel afterwards?

- **After sedation:** You may have slowed reaction time and poor judgment for 24 hours. Do not have anyone under your care that day. Avoid making important decisions or signing legal documents.

- Have a responsible adult stay with you the rest of the day. Do not drive for 24 hours.

- **Discomfort:** It is normal to feel bloated, or pass air. Walking will help relieve it. You may take a non-aspirin pain reliever containing acetaminophen, such as Tylenol. You may have some bleeding if a polyp was removed.

- **Medicines:** You may take your usual medicines unless your doctor says otherwise.

- **Activity:** Plan to rest when you go home. After 24 hours, return to regular activity when you feel ready.

- **Diet:** Follow your usual diet when you feel ready. Do not drink alcohol for 24 hours.

Serious complications are rare. A tear in the lining of the colon would require surgery. Your care team will discuss possible risks with you before the exam.

Test results

You will receive your results in 7 to 10 business days by phone, letter or My Chart.
